B240PX

Compact VV 23,7 m

The GSR double articulated platform B240PX allows to reach a maximum horizontal outreach of 12,3 metres. This machine maintains the vertical stabilization "in shape", with the result of being particularly compact, also thanks to its length in running order of 6,52 metres only.

Simple to use and technologically advanced, this model keeps the traditional levels of rigidity and sturdiness of the PX series and confirms the high-quality and innovation standards of GSR products.

GSR
AERIAL PLATFORMS

www.gsrspa.it

- Balanced and controlled swing of the articulations, making operations easier and safer
- Unrestricted rotation with 250 kg in the basket up to the maximum height
- "In shape" vertical stabilizers
- Up to 12,3 metres up-and-over outreach
- Intuitive and simple controls
- Advanced security systems, precise and immediate in use
- Light weight but robust structure
- Compact and balanced on the road like a normal car
- Easy and intuitive, ideal for self-drive hire
